QUILTON

GENERAL CATALOGUE

QUILTON was incorporated in 1983 with a clear remit to provide bespoke solutions with state-of-the-art equipment for water treatment plants.

Our mission has always been to provide ground-breaking solutions in water treatment, upholding the highest levels of commitment and quality that our customers expect of us.

At QUILTON, we are committed to the protection and preservation of natural resources, helping our customers to improve the environment.

OUR EQUIPMENT

SCREENS, FILTERS AND BAR SCREENS

Filtration screens to remove particles of all sizes from sludges, wastewater, drinking water or process effluents, with or without the removal of the screened solids.

SCREENING COMPACTORS

Drying and compacting of solids for a higher degree of dryness than standard conveyors.

SCREW CONVEYORS AND GRIT CLASSIFIERS

Transport and compacting of the solids removed from the waters for their disposal in a standard container or compacting machine.

COMPACT PLANTS

Compact treatment stations for holistic solutions in reduced spaces.
